**“hand”**  
 Every SCANPAN aluminum product is cast by hand and goes through eight sets of hands. The minutely-controlled process begins with recycled aluminum, from scrap or cans, which is melted down.

**Tradition**  
**Innovation**

**Sustainable materials**  
 Customers are also guaranteed an environmentally-friendly

handle and, after a final quality check, the product is packed in recycled materials and prepared for sale.  
 Polishing with Danish beeswax continues to be an important part of the finishing process for SCANPAN's pressure-cast frying pans.
