[Perfume bottle design?](#)

It is a very energetic and dynamic design. The bottle is made of clear glass and has a textured, ribbed surface. The design is simple and elegant, with a focus on the texture and the way the light reflects off the glass. The bottle is shown lying horizontally, which emphasizes its cylindrical shape and the way the texture wraps around it. The overall aesthetic is clean and modern, with a focus on the material and the way it is used to create a functional and beautiful object. Nest Getc Fragrance,
